

Change Files within Folder using Linux

```
$ for i in $(find . -iname "*.[current type of file]"); do mv "$i" "$(echo $i|cut -d '.' -f -2).[desired type of file]"; done
```

Forj Example: .txt to .js change

```
$ for i in $(find . -iname "*.txt"); do mv "$i" "$(echo $i|cut -d '.' -f -2).js"; done
```
